Good morning Paul,

Eastern Air Defense will not object to the Downeast II wind project for the windmill locations that you have informed us of via latitude/longitude.

Have a great day.

Very Respectfully,

///SIGNED///

Joe Bassett
Chief, Airspace Management

Good morning Joe,

I just had a chance to review this issue with our Military Consultant, Dave Belote. Dave believes he can offer some information and solutions that might be helpful in rectifying any conflict between current practices and our project proposal.

Would it be possible to schedule a time for you, Dave and I to talk by phone?

Please let me know what might be convenient for you.

Kind regards,

Paul Williamson

Subject: RE: [Non-DoD Source] Downeast II

Good morning Paul,

I have gotten the map program loaded this morning and plotted the wind farm.

I've attached a map, I hope it isn't too confusing. At point J aircraft can start to descend from 3,000 ft to 200 ft. The project is just north of J which would conflict. I don't want to give an objection without seeing if we can do anything on our end.

Very Respectfully,

Good afternoon Joe,

I am writing this with highest hopes that you have resolved your new computer issues and have become comfortable with the new system.

Please let me know how the review of the Downeast II wind project area is going.

Thank you and very best,

Paul Williamson

Good morning Paul

Well I've gotten the new program loaded but I have no map information yet.
Hopefully by the end of today I will be up and running. I can't be 100% sure yet because I can't plot, I think the new project may be in an area where aircraft can descend to 020AGL.

Very Respectfully,

Good afternoon Joe,

The records I have regarding this are as follows.

You provided the first attached map to me in June when we reviewed and discussed the map together for the first Downeast project.

The second attachment is of 2 maps from a third party consultant that we have asked to review the area.

The first map illustrates the position of the Downeast project, and the second of the Downeast II project. Upon my first review of these 2 maps it appears as though the both projects have similar impacts on training routes.

As the first project passed the review I assumed the second project will as well. Although I do not have an accurate perception of where altitudes change from one level to another.

I would be happy to discuss and learn more.

Please let me know when it may be convenient to talk.

Best regards,

Paul Williamson

Good morning,

We are running into mapping tool issues here. They told me I had to upgrade to Windows 10, which I have, to be able to run the new program we purchased.

Now they are telling me it's not approved for Windows 10 yet. I'm going to see if I can go back to the old version of Windows and then get it installed.

Do you have a map depiction of the request from last year and where the new ones will be? I think if we go any further north we may run into a conflict.

On IR800 aircraft cross point J at 30MSL but then can descend to as low as 02AGL to get to point K. If I remember correctly we were pretty close to J last year.

Very Respectfully,

Good morning Paul,

I will have to take a closer look at this and get back to you. The proposal I OK'd last year was a bit farther south where the IR800 altitude was 30MSL.
I mentioned if it went much more North where the route drops to 02AGL it would be an impact on IR800.

They just switched out my computer to the great Windows 10. I'm waiting for them to reload my airspace mapping tool. Once I get resettled I'll have a better idea.

Very Respectfully,

Dear Joe,

I sent a request for an informal project review to Steve Samples at the DoD Clearing House for an informal review. Mr. Samples sent me a request to discuss the project details with you to ensure there is not an adverse effect on the Air National Guard activities.

I am sending you 2 attached documents with the project location information along with the following information.

Please let me know if you have any questions or would like to discuss the details over the phone.

* Contact Information

* Company/Vendor/Developer

* Apex Clean Energy, Inc.

* Project Point of Contact First and Last Name

* Paul Williamson, Development Manager
* 1 Cattail Lane, Scarborough Maine 04074
* paul.williamson@apexcleanenergy.com <

Caution-Caution-<mailto:paul.williamson@apexcleanenergy.com> >

* 207-242-3521

* Company Address, City, State and Zip code

* Apex Clean Energy, Inc.
* 310 4th St. NE, Suite 200, Charlottesville, VA 22902
* office: 434-220-6341, fax: 434-220-3712

* Project Name, Nearest City or County and State

- * Downeast Wind II LLC
- * Town of Columbia, Washington County, Maine

*

* A spreadsheet with Latitude and Longitude for turbine positions and a PDF map is attached.

*

* This is a wind energy project that will include:

* 30 Wind Turbines

Wind Turbine: Vestas V136-3.45 MW

* Hub Height: 112 meters

* Blade Tip Height 180 meters

* Turbine Farm Layout is attached

Best regards,

Paul Williamson
