Classification: UNCLASSIFIED

Paul

Upon further / more detailed analysis, we find that your project as described in the attached xcel will not likely impair or degrade NORAD missions.

As such, NORAD has NO CONCERN at this time.

If your 30-turbine / 590' AGL project is submitted into OEAAA as attached, NORAD would not object during the formal review process.

As always, feel free to contact us anytime if we can be of further assistance.

Thanks, Stitch

Stitch Shepherd, DAFC  
Chief, Radar Analysis Branch (NJ36R)
